Mr. William Sofko
Interplastic Corp.
2015 Northeast Broadway Street
Minneapolis, Minnesota 55413

Dear Mr. Sofko:

RE: Submittal of Information Regarding Soil Sampling and Ground Water Analysis

To date I have not received information regarding soil sampling and ground water analysis. As a result of the April 30, 1986 meeting with Minnesota Pollution Control Agency (MPCA) staff, Mr. George Bain of Hatcher Inc., and representatives from Interplastics, additional information regarding soil sampling and analysis was to be submitted to my attention. Subsequent conversations with Interplastic Corp. indicated this information would be forthcoming.

The MPCA requests the company's plan for soil sampling and analysis, cursory investigation of the excavated soil indicate presence of contaminants.

Also the MPCA has not received a copy of the analysis of the ground water samples taken by Pace Laboratories on June 16, 1986.

In addition the MPCA has received more information regarding the alleged buried drums. The information gives specific burial sites. The MPCA will supplement the company's April 16, 1986 investigation using geophysical techniques developed by the MPCA's Site Response staff.

The MPCA requests the company to submit its soil sampling and analysis plan and the ground water analysis within ten (10) days receipt of this letter. The MPCA will contact the company to make site entry arrangements for the geophysical study.
